Art Unit: 2653

1) Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, drawn to audio device, classified in class 369, subclass 29.02.

II. Claims 15-20, drawn to method for management track files, classified in class 369, subclass 30.03.

2) The inventions are distinct, each from the other because:

3) Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as audio device capable of reading out track files from a recordable medium. Invention II is directed to method for managing track files by examining the number of track files on each session, the name and timestamp of each track files. See MPEP § 806.05(d).

4) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5) Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
